

EQUIPTT QUICK START GUIDE

Asynchronous Online Course

What is it?

- Structured presentation of specific instruction (e.g., how to deliver a treatment, introduction to the court system).
- Content can include text, video (lecture or demonstration), quizzes, and more.

Resources Needed

- Content Author.
- Designer: colors, fonts, layout, etc.
- Videographer/editor if including video.
- Programmer if developing a bespoke course site instead of using off-the-shelf course/learning management systems.

Considerations

- What are you trying to teach and to whom?
- Determine a format that matches content and audience.
- Accessibility for learners with disabilities.
- Will you charge a fee? If so, how much?
- Ongoing maintenance and support.

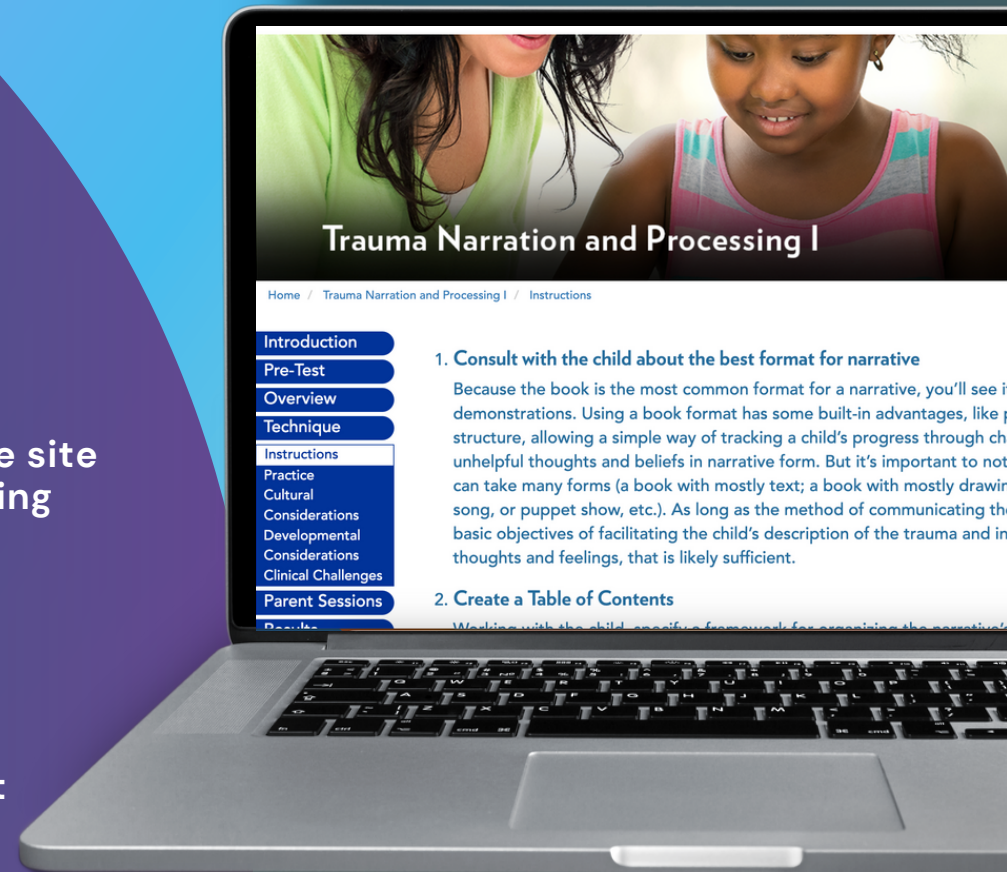

Pros

- Learner flexibility: accessible 24/7, at their own pace, and may be revisited as needed.
- Efficient delivery: develop course once and reach more learners than interactive training where limited by trainer availability, reasonable class-size, etc.

Cons

- Limited interactivity between trainer and learners.
